Sir:

Responsive to an Office Action dated October 21, 2004, whereon a three (3) month time period for response is set to expire on January 21, 2005, applicant in the above-entitled case amends and responds as follows:

In the Drawings:

Responsive to the Objection to the drawings citing a use of the reference character "21" as indicating both the bait and barbed hook, applicant notes that the error does not appear to be in the drawings, in that Figs. 2 and 5A through 6 show the bait identified by character 21 and the barbed hook as item 22. Rather, the error appears to be in the Specification and has been corrected as set out below. Applicant therefore believes that a submission of substitute drawings is not warranted.
